THE
CHARITY HOSPITAL
 OF LOUISIANA,

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted
 for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio President
 of the Institution.

*To record which and inscribe hereon the names and contributions of
 its distinguished benefactors,*

THIS TABLET HAS BEEN ERECTED.

ANNUAL REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL

For the Year Ending December 31st, 1904.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 1, 1905.

To His Excellency N. C. Blanchard, Governor of the State of Louisiana and
Ex-officio President of the Charity Hospital Board of Administrators:

Your Excellency—The year passed furnished nothing eventful in the management and in the work accomplished during this period. In the report of the Board, presented by the Chairman, you are furnished a brief though succinct statement of money received and expended, and of other matters pertaining to this institution.

A comparison of receipts from all sources for the past year with those of the previous year shows that, inclusive of cash on January 1, 1904, the revenues of that year amounted to \$152,578.13, whilst the revenues of the previous year, 1903, amounted to \$147,993.39—an increase for 1904 of \$4,584.74. The disbursements, however, in the past year exceeded those of 1903 by \$3,898.14, and amounted to \$136,398.04, leaving a surplus in the general fund of \$16,180.09 to be merged with the revenues of 1905. This satisfactory financial statement is based upon the fact that the \$5,000.00 last appropriated for the increase of the trained nurses, from 40 to 100, was not entirely utilized for that purpose. The increase of the corps has been necessarily slow, as great care is exercised in the selections as regards character, fitness and other qualifications. At the time of the appropria-

tion they were forty in number; the following year, sixty, and at the close of 1904, seventy-five. The limit will be reached at the close of this year. The cost for maintenance of one hundred trained nurses will amount to about \$10,000.00 a year, which will fully tax the present revenues of the Hospital. For a detailed account of the sources of revenues and expenditures you are respectfully referred to the reports of the Secretary and Treasurer and of the Finance Committee.

In the way of donations and legacies deposited in the special fund, they amounted in the past year to \$5,126.03, exceeding the amount received in 1903 by \$2,030.53. To the credit of the special fund we now have \$41,808.00. This fund is only employed in works of improvements, and by this means we have been enabled to erect the various buildings which have widened the scope and increased the efficiency of this great charity.

The number of patients admitted during the year numbered 8,698, and, with 600 remaining over from the preceding year, makes a total of 9,289. Of this number, 7,448 were discharged, 1,179 died and 662 remained on the 1st of January, 1905. Of the total number treated during the year, 5,333 were white adults and 3,556 colored, and 619 children of both races. With regard to sex, 2,366 were women—1,346 white and 1,020 colored.

In the Outdoor Clinics for men and boys, 11,202 applied, receiving 36,770 consultations.

In the Women and Children's Clinics 9,533 made application and 35,782 consultations were given. It will, therefore, be seen that 20,755 patients were treated in the Out Clinics and 72,552 consultations given—a larger number than in previous years. With regard to the mortality, 831 were males and 348 females. The total death rate was 12 1-2 per cent., and the net death rate 8 1-2 per cent., after deducting deaths occurring within twenty-four or forty-eight hours after admission.

The number of ambulance calls was 1,816, being 220 more

than was ever recorded in a year. Of accident cases, 5,206 were treated, which were more by 740 than has ever occurred.

The number of surgical operations performed amounted to 1,765, and of obstetrical cases to 263, with a mortality in the latter case of 3 1-2 per cent. None of the deaths, however, resulted from infection.

The Registrar reports a tabulated record of 1,288 cases.

The Pasteur Institute, established as an experiment, has more than satisfied the Board of the wisdom of its creation and of the necessity of its permanency. During the past year it has insured safety from rabies to 143 patients bitten and exposed to infection, and supplies a want that was greatly felt in this State.

Improvements have consisted only in the annual work of repairs and renovation of Hospital properties, and are fully described in the report of the House Committee.

The Pathological Department, the importance of which cannot be over-estimated in its relation to medical progress, has been a valuable aid to the Medical and Surgical Staff of the Hospital. During the year 1904 there were 14,113 examinations, chiefly of urine, blood and pathological specimens. This Department also has charge of the preparation of the antitoxin for hydrophobia and of the treatment of such cases.

All of the buildings are in good condition and every department is supplied with all necessities and conveniences. The surgical outfit is especially complete.

At the graduation exercises in November, certificates were issued to twenty nurses and one Sister. They were deemed qualified to perform the duties of their profession.

Without individualizing, the Board extends its thanks to the officers, Sisters, Visiting Staff, Ambulance Corps, Students of the Medical College and Training School, and to the employes, for service rendered in its management, direction and care of its inmates.

The books of the Secretary, Mr. Edwin Marks, show the painstaking and thoroughness of the work of this conscientious officer. The executive management of this Hospital by the House Surgeon, Dr. J. M. Batchelor, and his competent assistants, Drs. Danna and Stafford, meets with the full approval and cordial support of the Board for ability shown.

The services of Dr. Pothier, in charge of the Pathological Department of the Pasteur Institute, and his assistant, Dr. Couret, are greatly appreciated.

The work done in their laboratory is of a most delicate and taxing character and attended with personal risk, especially in the preparation of the antitoxin for hydrophobia.

The books in the Clerk's Department, of which Mr. Leake is the head, are admirably kept, which renders it easy to obtain any information regarding the patients admitted or leaving during the year.

The Pharmacy, of which Mr. Taylor is chief, is up to the standard in the quality of the drugs contained. A large number of the preparations are made under his immediate supervision, thus saving a considerable sum to the State.

The Engineering Department, over which Mr. Ponder presides, is in the prime condition which would be expected from so capable an engineer and so useful an officer.

The Ambulance Corps, the Resident Students (both male and female) of the Medical College and of the Training School for Nurses, have shown themselves earnest and conscientious in the discharge of their various duties.

The Domestic Economy, in charge of Sister Agnes and her associates, has been admirably conducted, and the supervision and direction of the Training School for Nurses were wise and motherly. Their presence, influence and example account for the high moral tone which prevails.

We thank our attorneys, of the firm of Farrar, Jonas & Kruttschnitt, for valuable services rendered without charge, and

especially to Mr. Kruttschnitt, on whom the burden has chiefly fallen. We sympathize with him in his present illness, and sincerely hope he will be among us soon in the exercise of his profession and in the service of the State, of which he is so eminent a citizen.

In closing, I desire to personally thank my colleagues. Our relations have been most harmonious and pleasant. We have worked together in unity of purpose to promote the welfare of this Hospital intrusted to our care.

Respectfully submitted,

E. S. LEWIS,

VICE PRESIDENT.

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1, 1905. }

To the Vice-President and Board of Administrators of the Charity Hospital:

Gentlemen—Your House Committee have the honor to report that in the matter of improvements but little has been done during the past year beyond the almost entire erection of a new carpenter shop. The old building, with the exception of the front brick wall, was in a very delapidated condition, almost unfit for occupancy, which necessitated its demolition and the erection of a good, substantial building in its place, with a floor of a permanent character.

Howard street from Tulane avenue to Gravier, one square, forming the eastern boundary of the Hospital, has been well and durably paved with Rosetta gravel, the same having been donated by the City without cost to the Hospital and the gravel hauled from Canal street by our neighbors, Messrs Roberts & Co., also free of cost. A new steel tank for the elevator has been placed in the main building. The three ambulances are in the best running order and the horses are in good condition.

In the matter of repairs, such as painting, kalsomining and general renewal of worn out pipe and places in the building have been attended to, and form the principal items of expense for the past year.

Your Committee, as usual, have to commend the continued very able services of Chief Engineer Ponder, whose duties are constant and given at all times, day or night, when necessary.

Respectfully,

LOUIS ED. VALLOFT, CHAIRMAN,
JNO. T. GIBBONS,
WM. G. VINCENT.

Annual Report of the Finance Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 1, 1905.

To the Vice President and Board of Administrators:

Gentlemen—Your Finance Committee respectfully report that the accompanying statement, prepared by the Treasurer, has been duly examined by the Special Committee appointed for that purpose, and by them found correct.

The said statement gives a history, in detail, of all the receipts and disbursements during the year 1904. It shows the total receipts of \$152,578.13 for 1904, as against \$147,993.39 for 1903, an increase of \$4,584.74. It also shows the total disbursements for 1904 to be \$136,398.04, as against \$132,479.90, or an increase of \$3,898.14; and we have at the end of the year a surplus in the General Fund of \$8,756.99, making \$2,216.93 less cash in the General Fund than we had at the same time in 1903.

The greatest increase in disbursements is shown in the following items:

Medical and Surgical Supplies	\$1,658 13
Employees	3,902 50

The following items of necessary supplies show a decrease during the past year as follows:

Meat	\$317 18
Bread	381 79
Fuel	1,096 52
Groceries	214 54

The following items of necessary supplies show an increase during the past year:

Milk	\$566 25
Ice	88 00

There was, at the end of the year, to the credit of the Special Fund, \$41,808.00, against \$36,944.36 at the same date in 1903.

As mentioned in previous reports, this fund is created by donations and legacies, and is used for the purpose of erecting new buildings and making permanent improvements, and is from time to time added to by benevolent friends of the institution. A list of the contributors to this fund is part of the Treasurer's report. The donations and legacies for 1904 were \$5,126.03, as against \$3,095.50 for 1903.

Respectfully submitted,

HUNTER C. LEAKE,

R. E. CRAIG,

G. A. WIEGAND,

Finance Committee.

ANNUAL STATEMENT OF CASH RECEIPTS AND FOR THE YEAR ENDING

RECEIPTS:

Cash on hand per last report January 1, 1904.....	\$10,973 92

C. Luttier, \$5.00.
Mr. Taxworth, \$5.00.
Mrs. Bourgeois, \$5.00.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 6, 1905.

To the Vice President and Board of Administrators:

Gentlemen—With the passage of the year we again find it necessary to lay before you a detailed account of the management of the Medical Department of the Hospital and submit the Hospital records of 1904.

The year just expired has been remarkable chiefly for the largely increased work of the Hospital.

On December 31, 1904, 600 patients remained in the Wards under treatment, during the year 8,689 were admitted, making a total of 9,289 patients treated indoors. Classified according to race and sex, there were admitted 5,333 white, 3,356 colored; male, 5,704, female, 2,366; children 619; (white, 394, colored 225).

Of the 9,289 inmates, 7,448 were discharged cured, improved or stationary, 1,179 died, and on December 31, 662 remained in the wards.

The gross mortality and the actual mortality as well, was probably the lowest yet reached, the one being 12 2-3 per cent., and the other 8 1-2 per cent.

The Coroner viewed 209 bodies; 380 patients died within thirty-six hours after admission.

The Outdoor Clinics have satisfactorily met the demands of a vastly increased clientele, 20,755 patients passing through that division, 11,212 men and boys; 9,543 women and children, and 72,522 consultations were granted. Compared with the previous year there was an increase of 1,453.

The work of the Ambulance Service has been proportionally increased; there were 1,816 calls made; the average time consumed in each call was thirty-one minutes. I wish in this connection to express my appreciation of the prompt response to calls and of the satisfactory manner in which the Corps of Ambulance Students have discharged the greatly increased work of the service.

The number of accident and emergency cases treated in the A. B. Miles' Amphitheatre is quite remarkable, all previous years being surpassed. Briefly, there were 5,206 patients of this class; 1,765 operations were performed; chloroform was administered 1,572 times, ether 131 times, Spinal Analgesia employed 56 times and local Analgesia 357 times.

In the Maternity Ward there were 263 cases of obstetrics, with no fatalities from September, and a mortality, from other causes, of 3 7-10 per cent.

The Department of Pathology and Bacterology has been maintained at its best, both in respect of its equipment and in the thoroughness of its special work. Drs. O. L. Pothier, Pathologist, and M. Couret, assistant, have discharged the duties of their department in a manner worthy of approval.

The management of the Hospital Dispensary has been economical and highly satisfactory. Both the chemist, Mr. W. T. Taylor, and assistant, Mr. Jos. Walker, have discharged their duties with promptness and skill.

Much valuable data has been collected and added to the Medical records of the Hospital.

The Registrar reports having filed 1,288 selected clinical histories, as follows: Medical, 604; Surgical, 526; Gynecological, 158.

The increase of Nurses in the Training School with the consequent extension of trained nursing to the male wards of the Hospital may be accounted a material improvement and must contribute to decrease the rate of mortality. Special reports

concerning the School have been addressed to the Medical Committee.

The great need for a Pasteur Clinic and the amount of good accomplished is demonstrated by the increasing number of patients applying for treatment. One hundred and forty-three persons bitten by rabid animals took the treatment in the past year; eighty-two were from Louisiana and sixty-one from other States, including two from Cuba.

The Milliken Memorial Adjunct for children has received all children seeking relief.

The Domestic Department, under the administration of the Sisters of Charity, has been conducted with care, economy and thoroughness. To the Sisters great thanks are undoubtedly due.

It is with regret that I must reiterate my observations made in my last annual report, however, not only must I do so but must even add more words. One year ago the Negro Surgical Section was overcrowded; patients slept on the floor; we could, only with the greatest difficulty, properly isolate contagious diseases; the surgical dressing rooms were too small and entailed delay and difficulty in dressing patients. This condition exists to-day, and, in addition, the white surgical wards are overcrowded and the Surgical Amphitheatre scarcely affords accommodation for the rapidly increasing work done in that department. We must have more room, another building, or it will be necessary to exclude patients from other States. In the past the Hospital has drawn no sectional line, but has received all indigent sick from whatever State they came. It was a great Hospital open to the sick of all States, but conditions are now such, that unless remedied, but one alternative remains—that the sick of Louisiana may not suffer neglect, the sick of other States must be excluded. This, I hope, will never be necessary.

That a clear comprehension of the growing needs of the Hospital may be had, it will suffice to contrast the work of 1903 with that of 1904, bearing in mind that 1903 was a banner year in so far as the number of patients were concerned.

For 1903 there were 8,816 patients treated in the wards; for 1904 there were 9,289 patients, for 1903 there were 19,302 patients in the Outdoor Clinics, for 1904 there were 20,755 patients; for 1903 there were 1,596 Ambulance calls, for 1904 there were 1,816 calls; for 1903 there were 4,519 accident and emergency patients treated in the Amphitheatre, for 1904 there were 5,206 patients.

Thus, concretely, and at a glance, it is evident that the work is outpacing the facilities at command for performing it. In view of the increased work, I desire to ask that the number of Ambulance Students be increased from 16 to 18. I do not believe the present number adequate to the work.

Before closing I must express my appreciation of the services rendered by the gentlemen of the Visiting Staff. Attendance has been more uniform and punctual and the service generally improved.

My assistants, Drs. J. A. Danna and S. W. Stafford, have discharged their duties to my entire satisfaction.

The Hospital records have been kept with accuracy by Mr. J. B. Leake, Clerk. Mr. John Ponder, Engineer, has managed his department in a manner to reflect credit upon himself.

Respectfully submitted,

J. M. BATCHELOR,

HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 3, 1905.

To the Board of Administrators of the Charity Hospital:

Gentlemen—I have the honor to submit the following report of work done in the Pathological Department for the year 1904. This report also includes the annual report of the Pasteur Institute for the same year :

Specimens of urine examined	9,021
Specimens of blood examined.	3,123
Specimens of sputa examined.....	999
Specimens of feces examined.....	363
Specimens of cultures examined.....	191
Specimens of pus examined.....	155
Specimens of tissues examined	201
Specimens of fluids examined	31
Specimens of stomach contents examined.....	17
Specimens of discharge examined	10
Specimens of secretions examined.....	2
Gall Stones examined.....	1
Autopsies held.....	156
Photographs and skiagraphs taken	97
	14,367

In the Pasteur Institute there were 254 cases that applied for treatment. Of these, 143 were treated; 111 were dismissed without treatment. These 143 cases are divided as follows: 52 belonged to Class A.; 21 to Class B., and 70 to Class C. Of

the cases treated, 130 were discharged cured, 8 deserted and 2 died, leaving three still under treatment January 1, 1905. The residence of these cases is as follows: From the city, 57; from Louisiana, 25; from Mississippi, 25; from Texas, 19; from Alabama, 10; from Cuba, 2; from Indian Territory, 1.

In concluding this report I wish to call the attention of the Board to the necessity of having more assistance in the Department. The work is increasing steadily, and it becomes necessary that the Department should have more help to accomplish its work. I wish to commend the assistance of Mr. M. Couret, the Assistant Pathologist, also the assistance given by the Resident students detailed to the Department, in fact, to the whole Corps of Resident Students who for the past months have assisted in the work of the Department. I wish to thank Dr. J. M. Batchelor, the House Surgeon, for facilitating and enhancing the work of the Department.

Respectfully,

O. L. POTHIER, M. D.,

PATHOLOGIST.

Report of Directress.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, May 20, 1905.

To the Members of the Medical Committee, Charity Hospital Board of Administrators

Gentlemen—Each precurring year is freighted with the pleasing task that associates our Hospital work with the sending broadcast a body of young women trained in a skillful care of the sick and wounded and that are to represent this great charity in good service and public weal.

The breadth of experience herein gained is obviously attractive from an educational view-point, and is supplemented through the generosity of a philanthropic citizen by a healthful provision for the pupil nurse's care.

The capacity of the School is being gradually equaled, and during the coming session it is hoped will have reached a full service. The School to-day comprises in its several classes seventy-five nurses distributed by service throughout the Institution, including the several male wards, wherein their duty is both by night and day. The full complement that the coming session will permit us to secure, gives the requirement towards which we have aimed in a representative benefit to our sick and suffering.

During the year our Classes were saddened by the death of Miss Daisy Neil, a member of the Senior Class, which sad event occurred on January 26, of the present year. Her promise in professional nursing was bright, and we sincerely regret her loss. Beyond this unpleasant incident in the School's life, our pupils have been unusually healthy.

In the graduation of to-day we have submitted to our Faculty of Lecturers twenty-one Nurses and one Sister of Charity for examination as to their fitness for the Hospital Diploma and Medal. The fulfillment of their desires and privileges of service will permit the advancement of thirty-three to the Senior Class and thirty-two to remain as Juniors, in addition to which many more are to be added in the month of January, in which month the accepted ones are to take up the work as beginners.

During the year that has passed, three hundred and sixty-six applications were received; of this number fifty-four were accepted. During the term seven were released, a lesser number than during any preceding year.

The graduates upon this occasion are young women for whom a close association has won my endearment and their fitness finds naught but a hearty approval to their advancement. The Faculty of Lecturers have aided very materially in the year's work, and I feel most grateful for their kindness and attention.

Instructions in Massage practically applied, under the guidance of Miss L. Woodin, has been continued as an essential and excellent training.

The duties and work give the privilege of expressing my appreciation of the favor and helpful effort of our House Surgeon, Dr. Batchelor, and his Assistants, Drs. J. A. Danna and S. W. Stafford.

The work accomplished represents a painstaking effort to further the cause of human kindness to a Medical precision and for a generous all-evident good.

Respectfully, submitted,

SISTER AGNES,

DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, May 20, 1905.

To the Vice President and Members of the Board of Administrators:

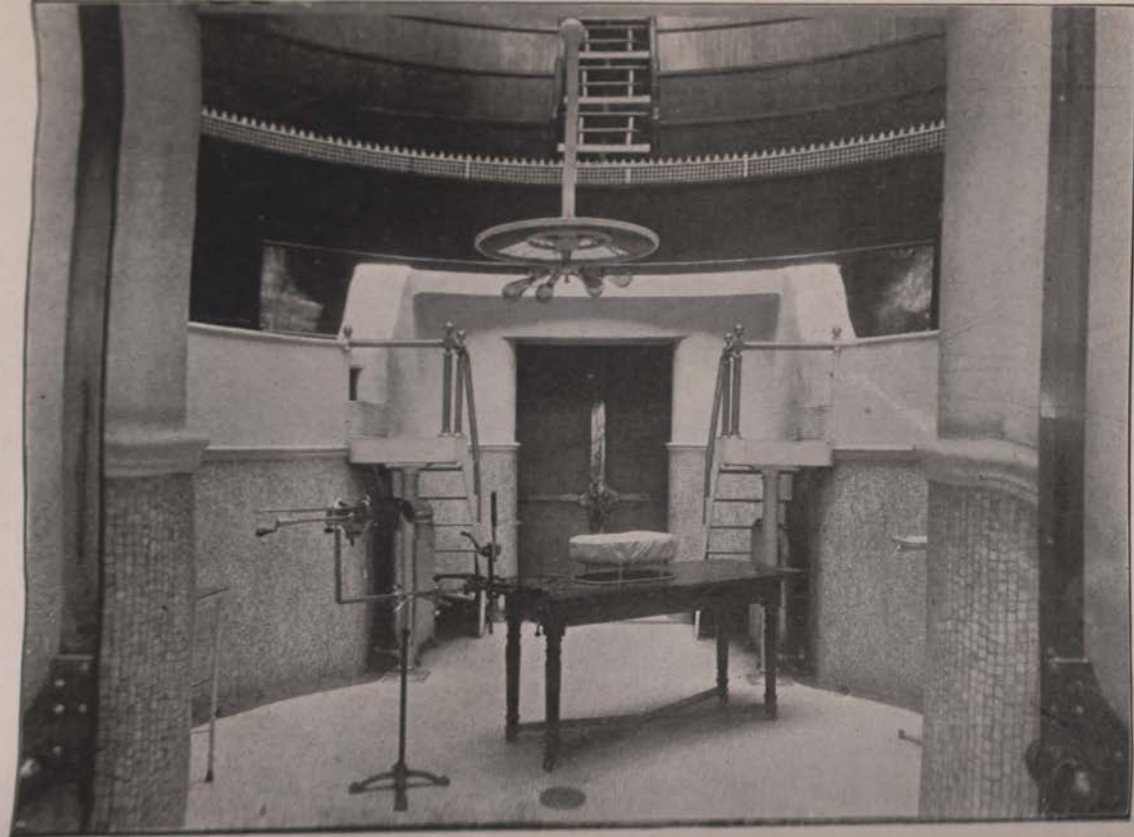

Gentlemen—At the end of the eleventh year of existence of the Training School for Female Nurses we confess our pleasure to report growing popularity, increase in the number of pupils and an extension of female nurses throughout the entire Hospital. In the past session the School contained the greatest number of Nurses since its founding. To-day we graduate the largest number since its founding, and we begin the session with the largest Senior Class we have ever had. Our policy has been to slowly increase the number of Nurses so that from year to year an even balance would be maintained between the Senior and Junior Classes. With this increased number of Nurses we have in the past year found it possible to distribute female nurses among the male wards in the Hospital. The need for Trained Nurses in the male wards has been long felt, and I have now to inform you that this need has been in a measure met.

I now present to you, on the part of the Faculty of Lecturers, the Graduating Class of 1904. These young ladies have successfully undergone the examinations and have acquired at the bedside that practical knowledge of nursing which is essential to the making of a successful Nurse. I desire to return thanks to my professional associates in the Faculty of Lecturers for the interest they have displayed, and for the valuable assistance they have given in promoting the welfare of the School.

To Sister Agnes, Directress, and Sister Dolores, Superintendent of Nurses, I offer my grateful appreciation for their kindly help and support in the interest of the School.

Respectfully submitted,

J. M. BATCHELOR, M. D.,
CHAIRMAN.

OPERATING ROOM SHOWING LORENZ HÜFTREDRESSEUR.
